  - **Gitlab:**
    - https://gitlab.com/thuctdhe171729

EDUCATION

- **FPT University**
  - **Major:**
    - Software Engineering
      - 2021-2026
  - **GPA: 3.0/4**

PROFILE

As a Software Engineer student with experience working on real-world projects, I am eager to further develop my skills as a web developer. I am seeking a dynamic working environment where I can learn from others and contribute to various projects to enhance my practical experience.

PROJECT WEB

1. **Online Shopping (Personal project)**

- Gain practical experience in project management and functionality by building an effective online shopping website with 2 interfaces: Client and Admin. The interface is essentially complete.
- **Teck Stack:**
  - **Frontend:** React, Material-UI, Tailwind CSS
  - **Backend:** Node.js, Express.js, MongoDB
  - **Authentication:** JWT, bcryptjs
  - **Cloud:** Cloudinary (upload), Vercel + Render (deploy)
- **Client:**
  - Shopping interface, shopping cart, payment (VNPAY)
  - Admin dashboard for managing products, orders, and statistics
  - RESTful API with authentication and file uploads
  - Responsive design, email notifications
- **Demo**: https://ecommerce-five-lime-99.vercel.app/
- **Github:** https://github.com/Thuc29/Ecommerce

2. **BallSport - Football Connect & Booking Hub (Group project)**

- Online soccer field booking web application with multi-role permission system (Player, Owner, Admin), integrated VietQr payment, Goong Maps, and Google OAuth login.
- **Role**: Front-end Developer
- **Tech Stack**: React.js, Tailwind CSS, React Query, Axios, Framer Motion, Material UI, Google OAuth, VietQR API, Shadcn/Ui
- **Main Responsibilities:**
  - Build responsive UI/UX for modules: field booking, field management, opponent search, community
  - Integrate RESTful API from Backend
  - Develop permission-based routing system & custom hooks
- **Demo**: https://sep490-g19.vercel.app
- **Github**: https://github.com/SongLa016/SEP490_G19
